

Editorial

Scientific journals are the most important channel for the exchange of information and findings between researchers; also provide a way to bridge the gap between our community and fellow scientists.

International Journal of Advanced Research in Science and Technology (IJARST) is one of the Open Access journals devoted to various disciplines in science and technology. Open Access Journals are freely accessible via the Internet for immediate worldwide, open access to the full text of articles serving the best interests of the scientific community. All interested readers can read, download, and/or print open access articles at no cost! There is no subscription fee for Open Access journals. The modest open access publication costs are usually covered by the author's institution or research funds. Moreover, authors who publish in our Open Access journals retain the copyright of their article. Open Access journals are no different from traditional subscription-based journals; they undergo the same peer-review and quality control as any other scholarly journal.

International Journal of Advanced Research in Science and Technology (IJARST) is a Print and Open Access online journal, which publishes research articles, reviews and letters in all areas of Science and Technology.

The journal aims to provide the most complete and reliable source of information on current developments in the field. The emphasis will be on publishing quality articles rapidly and making them freely available to researchers worldwide. All published articles will be deposited immediately upon publication in at least one widely and internationally recognized open access repository. Moreover, all articles are indexed by PubMed, Google and Google Scholar, therefore providing the maximum exposure to the articles. The journal will be essential reading for scientists and researchers who wish to keep abreast of the latest developments in the field.

Between issues you can stay in touch through our website, www.ijarst.com, where you will find the current issue in PDF format, submission guidelines and back issues.

We also welcome Science and Technology communication events (conferences, meetings, etc.), training opportunities, job postings or courses offered. If you have Science and Technology communication-themed products such as books, DVDs, television programmes, magazines or websites that you would like to see reviewed by the journal editorial team, simply send the necessary information to: editor@ijarst.com. This is also the address to send any questions, comments or opinions. We'd love to know what you think!

Happy reading,

S. K. Dhavala
Editor-in-Chief
